Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 04 February 2004.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group I, species of figures 1,9 and subspecies of figures 11a,11b in Paper No. 9 is acknowledged.

Claims 7,12-13, 38, 42 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species , there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 9.

An action on the merits now follows.

Specification

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The language of means for engaging is not supported as originally filed.

The disclosure is objected to because of the following informalities: It is the Examiner's position that Applicant has evoked sixth paragraph, means-plus-function language to define Applicant's invention. Therefore the Examiner requires the Applicant to amend the specification pursuant to 37 CFR 1.75(d) and MPEP 608.01(o) to explicitly state, with reference to the terms and phrases of the claim element, what structure, materials, and acts perform the function recited in the claim element. Please note that

Art Unit: 3763

the MPEP clearly states, "Even if the disclosure implicitly sets forth the structure, materials, or acts corresponding to the means-(or step-) plus-function claim element in compliance with 35 U.S.C. 112, first and second paragraphs, the PTO may still require the applicant to amend the specification pursuant to 37 CFR 1.75(d) and MPEP 608.01(o)...". (Also see **MPEP 2181** (Rev. 1, Feb.2000)) *Wolfensperger*, 302 F.2d at 955, 133 USPQ at 542. Appropriate correction is required.

Appropriate correction is required.

Claim Objections

Claims 43-45 are objected to because of the following informalities: It is the Examiner's position that Applicant has evoked sixth paragraph, means-plus-function language to define Applicant's invention. Therefore the Examiner has objected to the claims for the reasons set forth above in the objection to the specification.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 3763

Claims 1-2,4-5,8,24-29,32,33,34-35,37,39-41,43-44,46-47,48-49,51-54 are rejected under 35 U.S.C. 102(e) as being anticipated by Zaslavsky et al. (U.S. Patent No. 6,228,023).

Zaslavsky et al. disclose a device having a tubular member 22 having a distal tip having an annular surface surrounding a port and a plurality of barb/ projection/ means for engaging 40, 42 projecting at an angle from the annular surface , each bar having a sharp edge. The device is considered to be capable of performing the function.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5,8-10,24-37,39-41,43-54 rejected under 35 U.S.C. 102(b) as being anticipated by Kieturakis (U.S. Patent No. 5,662,673).

Kieturakis discloses a device having a tubular member having a distal tip having an annular surface surrounding a port and a plurality of barb/ projection/ means for engaging (e.g. 54 a, 54b) projecting at an angle from the annular surface , each bar having a sharp edge. See figures 1, 3-6 and all the similar figures. The barbs are considered to be unidirectional with one another. The device is considered to be capable of performing the function.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Spinoso et al. (3,815,608) is considered to be pertinent since it discloses barbs on the member surface which rotates to be retained in one direction and disengages upon counter rotation.
